Summary

Flutter Developer with close to three years of full-time experience and 17 client apps live on the App Store and Google Play. Has built payments, real-time tracking, live maps and Firebase backends, and can take over an unfamiliar codebase.

Skills

Mobile: Flutter, Dart, Android, iOS, platform channels, FCM push notifications, deep links, universal links

Architecture: MVVM, Clean Architecture, Repository pattern, dependency injection, GetX, BLoC

Backend and data: REST APIs, WebSockets (Socket.IO), Firebase, Supabase, SQLite, SharedPreferences

Integrations: Stripe, Stripe Connect, Google Maps, live navigation, in-app chat, in-app ads, authentication

Tools: Android Studio, Xcode, VS Code, Git, GitHub, Postman, Figma, App Store Connect, TestFlight, Google Play Console. Also used SwiftUI, React and Three.js.

Experience

Flutter Developer

Jan 2024 – Present

Jeux Developers, Sahiwal, Pakistan | Full-time

- Worked on 11 client apps live on the App Store and Google Play (9 on iOS, 7 on Android), built in Flutter and Dart, from rentals and vouchers to vehicle records and AI tools.
- Implemented Google Maps, live navigation, socket-based real-time updates, API integration, FCM push notifications, Stripe payments and Stripe Connect embedded onboarding for FasoRide, a ride-hailing and delivery platform of 3 apps: customer, driver and store.
- Built real-time ride tracking over WebSockets (Socket.IO) with acknowledged events, a connection watchdog and automatic reconnects, saving active-ride state locally so screens recover after a restart.
- Built the Firebase backend for MyBP TracR and the backend for MyMedBuddy, and worked with Supabase on client projects.
- Integrated authentication, in-app chat, deep and universal links, in-app ads and platform-channel code across client apps, using MVVM, the repository pattern, GetX and BLoC.
- Handled releases: production builds, TestFlight audits, store submissions and fixes for issues reported after launch.

Projects

Kusine: Food delivery platform for restaurants, customers and delivery riders. Designed the UI and handled the backend integration.

MyMedBuddy: Medical learning platform for doctors and students with flashcards, AI interview practice and OSCE preparation across roughly 130 screens. Also built its backend.

MyBP TracR: Health tracking app for blood pressure, smoking, alcohol, food entries and history. Built the Firebase backend.

Education

BS Computer Science, PMAS-Arid Agriculture University, Sahiwal, Pakistan. Expected graduation 2028
